MKM 205: Retail Management

Credits: 3
Lecture Hours: 48

Course Objective
This course aims to provide knowledge and skills to students in the area of retail marketing management required specially for the big retail institutions.

Course Description
This course contains introduction, consumer behavior and retail operation, the management of service and quality in retailing, retail marketing mix, the retail product and retail brand, merchandise management, retail pricing, retail communication and promotion, retail distribution and supply chain management, consumerism and ethic in retailing.

Course Details
Unit 1: Introduction
LH 6
Concept of retailing, characteristics of retailing. Types of retailers. Growing importance of retail industry. Dynamism in retailing: environmental theory, cyclical theories, and conflict theory. Retailing and marketing – strategic approach to retail marketing;

Unit 2: Consumer Behavior and Retail Operations
LH 6
Consumer behavior in retail context- simple model of retail purchase, time taken to shop, buying roles buying decision process and its implications for retail management, influences on the consumption process: motivational forces, demographic factors, social class, family influence, psychographics, role of children, social influence

Unit 3: The Management of Service and Quality in Retailing
LH 5
Service components in retailing: tangible – intangible continuum, service quality management – Model of perceived serviced quality, quality gap model: the Gronroos model of perceived quality management and the Parasuraman, Zeithaml and Berry model, implementation of service management, growing emphasis on quality control, characteristics of retail quality, quality auditing system, service recovery in retail context.

Unit 4: Retail Marketing Mix, the Retail Product and Retail Brand
LH 8
Concept of retail marketing mix, marketing mix for retail services, retail products and its breakdown, concept of retail brand, role of branding in retail business, retail brand positioning, brand loyalty, brand personality, consumers’ concept of self image, brand proposition, managing brands over their life cycles, brand updating, brand extension
Unit 4: Merchandise Management
Merchandise management concept, methods of planning and calculating inventory levels, merchandiser skills and profile, category management, range planning, space allocation, merchandise assortment and support, negotiating the purchase

Unit 5: Retail Pricing
Concept of retail price, price sensitivity, factors affecting price sensitivity, approaches to retail pricing, pricing and the relationship to value, mark down policy consideration for retailers

Unit 6: Retail Communication and Promotion
Objectives of retail promotion, promotional budget approaches communication effects, advertising, sales promotion, retail marketing and loyalty schemes, design and implementation of relationship marketing scheme, personal selling, public relations

Unit 7: Retail Distribution and Supply Chain Management
Channels and channel flows, supply channel, growth of channel relationship and partnership, distribution logistics and stock control, retail logistics: the cost structure; Retail marketing practices in Nepal;

Unit 8: Consumerism and Ethic in Retailing
The different pressures for a company to be socially responsible, criticism of marketing activities, product misuse and safety issues, green issues, acceptability of societal marketing approach, corporate social responsibility; Retailing and Consumer protection in Nepal; International retailing: process, patterns and challenges;

Recommended Book
Singh, Harjit (Dr), Retail Management: A Global Perspective; Test and Cases. S. Chand & Company Ltd, New Delhi.
MKM 204: Services Marketing

Credits: 3
Lecture Hours: 48

Course Objective
This course aims to impart fundamental knowledge about marketing of services and service industries. In addition, this course also makes an attempt to acquaint knowledge to them regarding service marketing practices in Nepal.

Course Description
This course contains introduction to fundamentals of service marketing, models in services marketing, market segmentation, targeting and positioning for a services form, customer perceptions and expectations of services, buyer behavior and relationship marketing, buyer behavior and relationship marketing, service strategies, emerging service sectors in Nepal.

Course Details
Unit 1: Introduction
Meaning, characteristics and classification of services; Reasons for the growth of services sector; Challenges in service sector; Concept and importance of services marketing; Marketing mix decision for services – product, price, place, promotion, process, people and physical evidence;

Unit 2: Models in Services Marketing
The molecular model; the servunfunctional model; the industrial management model; The market-focused management model

Unit 3: Market Segmentation, Targeting and Positioning for a Services Firm
Concept and process of market segmentation for service product; Market segment strategies for service products; Concept and process of service positioning in the target market; Service positioning strategies;

Unit 4: Customer Perceptions and Expectations of Services
Customer perception on service products; Customer satisfaction and service quality; Gap model of service quality; Concept of customer expectations and factors influencing customer expectations; Service encounters and moment of truth; Management of customer service expectation; A process model of customer service expectation management;

Unit 5: Buyer Behavior and Relationship Marketing
Understanding buyer behavior; Effect of relationship marketing on buyer behavior; Transactional selling and relationship marketing; Customer relationship development strategies; Customer value building approaches;
Unit 6: Service Strategies

**Service Product and Quality Management:** Concept and nature of service product; New service product and service product development; Life-cycle strategies for service products; Branding the service product; Maintaining service quality and model of service quality; Service-profit chain strategy; Researching service quality and setting quality standard.

**Pricing Strategies for Services:** Pricing objectives and buyers’ perception of value; Considerations of services pricing – demand considerations, cost considerations, competition considerations, legal considerations; Emerging service pricing strategies – satisfaction-based pricing, relationship pricing, efficiency pricing. **Promotion Strategies for Services:** Promotion mix for service product; Selection strategies for selecting the promotion mix; Integrated marketing communication for service product – service promised, communicated message, internal communication, and guarantees; Social ethics in service promotion.

**Distribution Strategies for Services:** Nature of distribution for service products; Factors affecting the choice of distribution channels; Distribution strategies – intensive, selective and exclusive; Managing distribution channels – selection, motivation, training, evaluation, managing conflict; Role of Internet in global distribution system.

Unit 7: Emerging Service Sectors in Nepal

Introduction; Healthcare sector; Banking and insurance sector; Tourism sector; Information technology and networking sector.

Basic Books:
Woodruff, Helen, *Services Marketing*, Macmillan India Ltd., Delhi.

References:
MKM 206: Distribution Management

Credits: 3
Lecture Hours: 48

Course Objective
This course aims to students' knowledge and skills in analyzing distribution issues, designing appropriate distribution channels, policies as well as strategies and managing physical distribution and market logistics with special reference to distribution management of Nepal.

Course Description
This course contains introduction to distribution management, fundamentals of marketing channel, classification of marketing channels, managing marketing channels, channel planning and design, supply chain management, physical distribution and logistics management, distribution management in Nepal.

Course Details
Unit 1: Introduction
LH 4
Concept and objective of distribution management; Distribution coverage; Aspects of distribution management: Channel management and physical distribution management.

Unit 2: Fundamentals of Marketing Channel
LH 6
Meaning and role of marketing channels; Channel structure for consumer and industrial goods; Selection of marketing channels; Marketing channel system: vertical, horizontal and multi-channel systems; Power of channels members. Sources of channel power; recent trends in marketing channels: symbiotic marketing, third party delivery, multi-channel marketing systems, multi-level marketing, channel reduction and elimination, e-marketing, direct marketing, etc.

Unit 3: Classification of Marketing Channels
LH 4
Wholesaling: role, contributions and classifications; Retailing: role, contributions and classifications; Agent Middlemen: role, contributions and classifications.

Unit 4: Managing Marketing Channels
LH 6
Channel conflicts and coordination; Channel conflicts management; Channel information systems: Meaning, objective and elements of channel information system; Designing a channel information system.

Unit 5: Channel Planning and Design
LH 7
Meaning of channel planning and design; Process of channel planning - complete understanding of existing channel conditions and challenges, conduct competitor channel analysis, assess opportunities in existing channels, develop a near-term plan of attack, conduct gap analysis, identify and develop strategic options, conduct qualitative and quantitative end-user analysis, develop an ideal channel system; Types of channel design – vertical, horizontal and hybrid channel; Factors in channel designing - efficiency, effectiveness, capacity, agility, consistency, reliability, integrity; Setting channel policies and strategies – market coverage, customer coverage, pricing, product lines, selection of channel members, termination channel partners, ownership of the channel, legal constraints.
Unit 6: Supply Chain Management

Meaning and flows in supply chain system; Role of purchasing in supply chain system; Value-chain analysis in supply system; Essentials in supply chain management which may bring competitive advantage- efficient consumer response, category management, continuous replenishment, quick response logistics, handling functional and innovative products, benchmarking.

Unit 7: Physical Distribution and Logistics Management

Meaning of physical distribution and logistics management; Role of physical distribution management in marketing; Value of customer service in logistics management; Physical distribution and logistics functional decisions – Transportation Decision – concept, functions and role, selection of modes of transportation, transportation strategies, recent trends in transportation; Warehousing and Storage Decision – concept, functions and role, types of warehouses, warehousing strategies, selection of warehouse; Inventory Control – concept, function and role, factors influencing inventory level, technique of inventory control; Order Processing – concept, functions and role, steps in order processing; Materials Handling – concept, function and role, tools and methods of material handling, Logistics Information Management – exchange of information between the seller, carrier and the buyer from the date of shipment till the goods are received by the buyer; Difference between logistics management and supply chain management.

Unit 8: Distribution Management in Nepal

Mode of transportation in Nepal - containers, railways, trucks and lorries, ropeways (including cable cars), airlines, pipelines, etc; Role of government sector in distribution management, including Nepal Food Corporation, Agricultural Inputs Corporation, Salt Trading Corporation and Nepal Oil Corporation; Role of wholesalers and retailers in Nepal’s distribution management; Problems and challenges in distribution system of Nepal – Difficult topography, landlocked character of the country, Scarce domestic productions, import-based economy, lack of proper rules and regulations, geographical concentration of industries and businesses, lack of visionary decisions (short-sidedness decision) with planners and decision makers, etc.

MKM 207: Market Research

Credits: 3
Lecture Hours: 48

Course Objective
The basic objective of this course is to make students understand the concept of marketing research, basic techniques of identifying research problems, developing the research methodology, preparation of research proposal and research report. In addition, it also aims to give practical knowledge to the students about the use of various analytical tools in marketing research.

Course Description
This course contains introduction, defining research problem and setting research objective, review of literature, developing research plan, date collection, analysis and interpretation, preparation of report and reporting, Applications of Marketing Research, Preparation of Research Proposal.

Course Details
Unit 1: Introduction
Meaning and nature of marketing research; Role of marketing research in strategic decision making; Types of marketing research; Scope of marketing research; Factors affecting marketing research decisions; Limitations of marketing research; Ethics in marketing research; Process of marketing research: defining research problem and objective setting, reviewing the literature, developing plan for research methodology, data collection, analysis and interpretation of data, and preparation of research report.

Unit 2: Defining Research Problem and Setting Research Objective
Concept of research problem and Problem identification; Components of a research problem; Steps of problem identification; Problem formulation: Statement of the problem; Meaning of research objective, setting the research objectives. Formulation of hypothesis

Unit 3: Review of Literature
Meaning and significance of review of literature; Sources of literatures; Process and Techniques of literature review;

Unit 4: Developing Research Plan
Developing the research methodology; Components of research methodology – research design, source and nature of data, data collection procedure, population and sample, technique of data collection, use of analytical tools; Concept of research design; Characteristics of a good research design; Components of research design; Types of research design; qualitative and quantitative research. Sampling: concept and terminologies; importance of sampling; Types of sampling

Unit 5: Data Collection, Analysis & Interpretation
Introduction; Collection of secondary data: sources of secondary data; problems used in secondary data. Collection of primary data: Observation, questionnaire survey, experiment: merits and demerits. Questionnaire: meaning and types; questionnaire development process; Data analysis: concept and methods of data analysis; Use of statistical and mathematical tools in marketing research; types of scale used in research; Meaning and significance of interpretation of facts.
Unit 6: Preparation of Report and Reporting  
Report writing; Types of reports; General guidelines for report writing; Format of a marketing research report

Unit 7: Applications of Marketing Research  
Areas of marketing research; Research for market segmentation; Product research; Advertising research; Sales and Distribution research; Consumer research; Attitude and psychographic research;

Unit 8: Preparation of Research Proposal  
Meaning and significance of research proposal; Contents of a marketing research proposal;

Basic Books
Kerlinger, Fred N., Foundations of Behavioral Research, Surjeet Publications, Delhi.

Reference Books
MKM 208: Public Relations & Media Management

Credits: 3
Lecture Hours: 48

Course Objectives
This course aims to provide students’ knowledge and skills with the necessary understanding of the functioning of public relations and media management properly.

Course Description
This course contains introduction, public relations and marketing practices, public relations planning, public relation Campaigns, advertising agency and media, media planning, advertisement budgeting process, public relation public relation practices in Nepal.

Course Details
Unit 1: Introduction
Concepts, objectives of public relation, nature of public relation. Evaluations of public relation; marketing communications system; linear model of communication; two-step communication model.

ISM 204: Project Management

Credits: 3
Lecture Hours: 48

Course Objective
This course aims to familiarize students with the concept and practice of project planning, execution and controlling of projects and will cover the basic tools, skills, and knowledge necessary to successfully manage a project through its inception, design, planning, and transition phases.

Course Description
This course contains introduction, project planning and formulation, project organization, execution and control, leadership and teams in project management, Project Appraisal and Termination.

Course Details

Unit 1: Introduction
Concept, project management- nature and scope, types of project, project management and project manager, project management characteristics, need for project management, Project life cycle, skills and responsibility of a project manager, attributes of a good project manager, essential steps for a successful project initiation, project success and project failure.

Unit 2: Project planning and Formulation
Project environment, starting the project plan, Process of planning, human resources-the RACI matrix and agile projects, project risk management, estimating project budgets, improving the process of cost estimating, risk estimation, network techniques- PERT and CPM, resource allocation, the resource allocation problem, resource loading and leveling, constraints in resource scheduling, project formulation techniques, identification of investment opportunities, project screening, feasibility study, project selection and formulation, stages in project formulation, project report preparation.

Unit 3: Project Organization, Execution and Control
Projects in a functional organizational structure, projects in a projectized organization, projects in a matrixed organization, project in a composite organizational structures, selecting a project form, the project management office, human factor and the project team, the planning monitoring controlling cycle, information need and reporting, project management information system (PMIS), purpose of control, the project control process, types of control process, monitoring time performance, the design of control system, control of change.

Unit 4: Leadership and Teams in Project Management
Managing vs. leading a project, managing project stakeholders, influence as exchange, social network building, ethics and project management, building trust, assigning project work, five stages of team development, situational factors affecting team, building high performance project teams, managing virtual project teams, project team pitfalls.
Unit 5: Project Appraisal and Termination

Purpose of project appraisal, the project audit, the project audit life cycle, essentials of project appraisal, measurement, the varieties of project termination, termination of a project, the termination process, termination report.

Unit 6: Project Management in Nepal

Project management in developing countries, project identification and development in Nepal, Types of projects in Nepal, project implementation and appraisal. Benefits and limitations of project management, practical difficulties in project formulation and implementation.

ISM 205: Supply Chain Management

Course Objectives
Supply chain management, both in industry and in academia, has grown rapidly over the past several years mainly due to an increase in corporate goals of reducing manufacturing costs and the savings that come from planning and managing the supply chain effectively. This course aims to focusing on the integration of components associated with developing new products, buying materials, transforming them, and shipping them to customers.

Course Description
This course contains introduction, supply management, operations management, process management, distribution and customer relationship management, SC integration and performance measurement.

Course Details
Unit 1: Introduction
Concept, defining supply chains, objective of SCM, importance of SCM, elements of SCM, decision phases in supply chain, importance of supply chain decisions, process view and examples of supply chains, current trends in SCM.

Unit 2: Supply Management
Role of SCM in an organization, the purchasing process, sourcing decisions, role of supply base, supplier selection, choosing suppliers, purchasing organization, developing supplier relationships, supplier evaluation and certification, supplier development.

Unit 3: Operations Management
Role of forecasting in a supply chain, characteristics of forecasts, Demand forecasting, forecasting techniques, collaborative planning, forecasting and replenishment, risk management in forecasting, operations planning, the aggregate production plan, master production scheduling, material requirements planning, capacity planning, distribution requirement planning, the development of enterprise resource planning system, advantages and disadvantages of enterprise resource planning system, concepts and tools of inventory management, inventory models, the role of cycle inventory in a supply chain, managing multiechelon cycle inventory, estimating cycle inventory-related costs in practice, the role of safety inventory in a supply chain, determining appropriate level of safety inventory.

Unit 4: Process Management
Lean production and Toyota production system, lean thinking and SCM, the elements of lean, the origins of Six Sigma quality, comparing Six Sigma and SCM, the elements of Six Sigma.
**Unit 5: Distribution and Customer Relationship Management**

Concept, the fundamentals of transportation, modes of transportation and their performance characteristics, transportation infrastructure and policies, the role of IT in transportation, risk management in transportation, warehousing and distribution, the impacts of logistics on SCM, reverse logistics, role of customer relationship in SCM, key tools and components of customer relationship management, designing and implementing a successful customer relationship program, recent trends in customer relationship management

**Unit 6: SC Integration and Performance Measurement**

Concept, SCM integration model, obstacles to process integration along the supply chain, managing supply chain risk and security, concept of supply chain performance measurement, viewing the supply chain as competitive force, traditional and World-class performance measures, supply chain performance measurement systems, the balanced scorecard.

Lu, Dawei, Fundamentals of Supply chain Management, McBok Air Ventus Publishing
Lambert, Douglas M., James R. Stock, and Lisa M. Ellram, Basic concept of Supply Chain Management, Wiley
Course Objective:
This course aims to provide students with an understanding of the analysis, decision making and implementation issues of managing the operational aspects of a service. There must be a strategy for providing service, which matches the target market with the strengths of the Service Company. Furthermore, the operational decision-making must support the service strategy of the company.

Course Description
This course contains introduction, Service Strategy, Managing Service Operations and Processes, Productivity and Quality Improvement, Resource Utilization.

Course Details
Unit 1: Introduction
Concept and characteristics of services, types of services, service processes, success of a service operation, the service as a strategic tool, focused and unfocused service operations, differentiation between goods and services, critical factors of success, service management, service marketing environment, sources of service sector growth, challenges confronted by the service sector, the service product, new product development, product life cycle strategies, branding the service product, emerging service sectors in Nepal - banking, insurance, retailing and tourism service.

Unit 2: Service Strategy
Concept, distinctive characteristics of service operations, classifying services for strategic insights, the strategic service vision, service design elements, competitive environment of services, competitive service strategies - overall cost leadership, differentiation, focus; winning customers in the market place, the virtual value chain.

Unit 3: Managing Service Operations and Processes
Concept, managing demand and supply, customer’ role in service delivery, types of supply relationships, managing service supply chains, managing through intermediaries, supply partnerships, service guarantees, service process matrix, service level agreement; managing facilitating goods- role of inventory in services, characteristics of inventory systems and relevant cost and inventory system; order quantity models- EOQ, inventory model with quantity discount, inventory model with planned shortage; inventory control system- continuous review system, periodic review system and the ABCs of inventory control.

Unit 4: Productivity and Quality Improvement
Concept, service quality, model of service quality, customer value equation, stages in service firm competitiveness, making continuous improvement a competitive strategy, walk-through audit, quality and productivity, blueprint for service excellence, quality and productivity improvement process, quality tools for analysis and problem solving.
**Unit 5: Resource Utilization**

Concept, capacity management, operations planning and control, managing bottlenecks and queues, managing the capacity zone, improving the resource utilization, performance management and measurement, the purpose of measurement, a balance of measures, benchmarking.

**Text and Reference Books:**
ISM 208: Industrial Relations

Credits: 3
Lecture Hours: 48

Course Objectives
The course aims to acquaint students on all the dimensions of industrial relations and labour laws. It is organized into two parts: first part focusing on the history and theory relating to the industrial relations, and the second part providing detailed on specific provisions of labor laws being enforced in Nepal.

Course Description
This course contains introduction, trade unions, collective bargaining, employee grievances, conflicts and disputes, Worker Participation in Management.

Course Details
Unit 1: Introduction
LH 8
Concept, meaning, objectives and scope of industrial relations, forms of industrial relations, theories of industrial relations, industrial relations actors, the system perspectives of industrial relations, industrialization strategy and industrial relations, globalization and industrial relations.

Unit 2: Trade Unions
LH 10

Unit 3: Collective Bargaining
LH 10

Unit 4: Employee Grievances, Conflicts and Disputes
LH 12
Concepts, nature of employee grievances, causes of grievances, the grievance procedure, industrial conflicts, nature of conflict and its manifestation, conflict resolution, grievance and industrial relations, nature of industrial disputes, legal provisions on dispute settlement process in Nepalese organizations, strikes and lockouts-causes.

Unit 5: Worker Participation in Management
LH 8
Concept, determinants of workers’ participation in management, workers’ empowerment-techniques quality circle and its application Kaizen and its benefits quality of work life and work behavior, joint work committees, managing good industrial relations- problem and prospects future of industrial relations.

ISM 207: Services Marketing

Credits: 3
Lecture Hours: 48

Course Objective
This course aims to impart fundamental knowledge about marketing of services and service industries. In addition, this course also makes an attempt to acquaint knowledge to them regarding service marketing practices in Nepal.

Course Description
This course contains introduction to fundamentals of service marketing, models in services marketing, market segmentation, targeting and positioning for a services form, customer perceptions and expectations of services, buyer behavior and relationship marketing, buyer behavior and relationship marketing, service strategies, emerging service sectors in Nepal.

Course Details
Unit 1: Introduction
Meaning, characteristics and classification of services; Reasons for the growth of services sector; Challenges in service sector; Concept and importance of services marketing; Marketing mix decision for services – product, price, place, promotion, process, people and physical evidence;

Unit 2: Models in Services Marketing
The molecular model; the servunfuncional model; the industrial management model; The market-focused management model

Unit 3: Market Segmentation, Targeting and Positioning for a Services Firm
Concept and process of market segmentation for service product; Market segment strategies for service products; Concept and process of service positioning in the target market; Service positioning strategies;

Unit 4: Customer Perceptions and Expectations of Services
Customer perception on service products; Customer satisfaction and service quality; Gap model of service quality; Concept of customer expectations and factors influencing customer expectations; Service encounters and moment of truth; Management of customer service expectation; A process model of customer service expectation management;

Unit 5: Buyer Behavior and Relationship Marketing
Understanding buyer behavior; Effect of relationship marketing on buyer behavior; Transactional selling and relationship marketing; Customer relationship development strategies; Customer value building approaches;
Unit 6: Service Strategies

**Service Product and Quality Management:** Concept and nature of service product; New service product and service product development; Life-cycle strategies for service products; Branding the service product; Maintaining service quality and model of service quality; Service-profit chain strategy; Researching service quality and setting quality standard.

**Pricing Strategies for Services:** Pricing objectives and buyers’ perception of value; Considerations of services pricing – demand considerations, cost considerations, competition considerations, legal considerations; Emerging service pricing strategies – satisfaction-based pricing, relationship pricing, efficiency pricing. **Promotion Strategies for Services:** Promotion mix for service product; Selection strategies for selecting the promotion mix; Integrated marketing communication for service product – service promised, communicated message, internal communication, and guarantees; Social ethics in service promotion.

**Distribution Strategies for Services:** Nature of distribution for service products; Factors affecting the choice of distribution channels; Distribution strategies – intensive, selective and exclusive; Managing distribution channels – selection, motivation, training, evaluation, managing conflict; Role of Internet in global distribution system.

Unit 7: Emerging Service Sectors in Nepal

Introduction; Healthcare sector; Banking and insurance sector; Tourism sector; Information technology and networking sector.
